FACULTY OF ARTS TO MOVE THIS SPRING

Old Arts Building Will be Remodelled.

MARCH 15 DATE FOR CHANGE.

Statutes of University to be Revised by Committee

Further information about University affairs was given out by the Registrar, when he was interviewed by the Daily reporter yesterday. The building program of the corporation is to go ahead steadily. The new library wing will be completed about January 1 and rapid progress is being made on the Biological building. Tentative plans for several new structures have also been made but nothing definite can be decided at present. The Governors are not borrowing money to build but are suiting their actions to the current situation—as sufficient funds come in from the graduates and others, they are used for the most necessary buildings. A plan that will be of interest to all the frequenters of the Arts building is the one proposed for them now. It is expected that the new Biological building will be sufficiently completed for use about March 15 or thereabouts. The walls will be plastered and doors and windows fitted and the classrooms will be ready for occupation. The plan is to use this new building at the earliest possible moment for the Arts students and when the Arts men move out of their traditional lair, the intention is to commence remodelling the old Arts building so that it will be ready for use again in the fall. The Biological building will provide adequate room for the Arts lectures and it probably will be used for the Arts exams also. In this way it will not be necessary to disturb the remodelling workers when it comes to exam time. Rumors have been heard about plans for the changing of the system of learning in the Arts faculty but no definite plans have been made. It is probable that with the arrival of Dean Laing in January something will be done and that the session of 1922-23 will see other radical changes besides the lengthening of the session. As was stated in Wednesday's (Continued on Page 2.)

PROF. R. TRAQUAIR LECTURED ON ART

Wm. Blake and David Scott Two Artists Dealt With

On Wednesday evening Prof. Ramsay Traquair delivered an illustrated address to the Architectural Society on "Two Imaginative Artists" William Blake and David Scott. The slides amply illustrated the imaginative power of these two men, where misfortune it was to die before their works were truly appreciated.

William Blake, an Englishman, was born in 1757 in a commercially minded age, which did not prevent him from writing poetry and making drawings of unusual merit while still a boy. He was apprenticed to an engraver and it is there we may suppose that he developed the pure line which gives the strength and vigour to his later work. He married and lived rich in love but poor in this world's goods to the age of seventy. In all that time he lived in a two rooms house. One room, an exhibition gallery and the other living quarters.

His works were always big subjects on rather small surfaces due to his poverty. His best set is probably the one on Jerusalem including "The Crucifixion" a conception which for emotional effect is not surpassed by any other work on the same subject.

Although by some, he is criticized for his faulty technique, with the majority the greatness of his imaginative power overrules everything. His expressive treatment of figures was masterly.

David Scott of Edinburgh was born in 1808 and an acknowledged follower of Blake's. He also was an engraver and a master with the figure and in addition he had great expression. He did sets of pictures for The Ancient Mariner, Pilgrims Progress etc., many of them remarkable. His lack of public sympathy worked so on his mind however that he died disheartened at the age of 43.

The subject of this address was very apt as it is very refreshing to have such work brought to ones notice and understanding, particularly architectural students.

FINE BOXING PRODUCED AT UNION SMOKER

Final Bouts All Hotly Contested

LARGE ATTENDANCE

Medicine and Science Tie for Premier Honors

One of the most successful, or perhaps the most successful smoker ever seen at the University was held in the ballroom of the Union last night. There was a record crowd present, and they certainly got their money's worth and more. Every bout was a good one especially the last two, between Cope and Sullivan, and Abinovich and Boucher. Medicine and Science tied for the premier honours, each of these faculties getting three points each. Macdonald College gained the other by winning the light-heavyweight.

The fencers were the first to make an appearance and Fielding (Arts) and Smith (Science) put on a very good bout. Fielding was the more scientific of the two and won by five points to two.

The first boxers to come on were Mirsky of Medicine and Schleifer of Arts in the 108 lb. division. These pinweight put up a grand battle but in the last round Mirsky had much the better of Schleifer and was given the decision.

Reid of Sci. '23 and Matthews of Med. '23 were the next in the ring, and gave a fine exhibition of wrestling. Matthews held the key position during most of the match but was in some tight positions himself at times. Reid got out of many close corners, which seemed almost certain falls, by his clever bridging. Matthews was given the decision.

Pheifer and Macdonald were the next men to perform, and provided plenty of thrills along the wrestling line. Pheifer gained the first fall, but shortly afterwards Macdonald evened up the count. Macdonald showed more skill and was given the decision.

Wilson of Science and Goldapple of Commerce then mixed it up for the 118 lb. interfaculty boxing championship. Goldapple showed a decided tendency to mix and kept rushing Wilson. Wilson's longer reach, and his uppercuts proved too much for the smaller man, and Wilson won.

Cohen of Law, and Brisbane of Science, both welterweights, were the novices to wrestle, and showed themselves very capable. Cohen stands a fine chance of winning his weight this year. Cohen took a fall out of Brisbane in the first minute. There were no other falls so Cohen won.

Irvine and Howes two lightweight wrestlers gave a fine exhibition of science and speed but Irvine proved the more experienced of the two and won the nine minute match.

The next championship in the boxing was decided was the 125 lb. one. Snow of Medicine and Graham of Science were

"DAILY" NOTICES.

As previously announced, the last issue of the McGill Daily for the present year, will appear tomorrow. It will be found at its usual place again on January 4th next, when lectures recommence. In view of this fact any notices of events occurring in the days before college closes must be in the Daily box provided for their reception by ten o'clock this evening.

NEW COURSE FOR SOCIAL SERVICE DEPT.

To Be Inaugurated on January Ninth.

AN INNOVATION.

Scheduled to Last for Five Weeks

A short extension course of five lectures, to begin on January ninth 1922, has been announced by the Department of Social Service. The place of meeting will be the Chemistry and Mining Building. The lectures will be given at five p.m. on Mondays. The Registration fee is two dollars and fifty cents for outsiders but a limited number of university students will be registered without charge. The course is on Social Problems and the lectures will all be specialists from out of town. A short resume of the subject to be covered follows below:

JAN. 9th. "THE CITY IN WHICH WE LIVE."

J. A. DALE, M.A. Oxon., Professor of Social Service and Director, Department of Social Service, University of Toronto.

"The intricacies of our present social and industrial system make it impossible for us to live isolated and independent lives, and with our dependence on others come certain social duties and responsibilities."

Jan. 16—"Poverty, A Social Disease."

Frederic Almy, M. A. Harvard, for 25 years Secretary of the Buffalo Charity Organization Society; ex-President of the National Conference of Social Work.

"We can neglect poverty, but if we neglect poverty it will not neglect us; neglected poverty is a running sore which poisons the whole body politic. As with tuberculosis, poverty is a communicable disease. This is true at least of incipient poverty, as it is of incipient tuberculosis."

JAN. 23rd. "HOME OR HOVEL."

C. J. Hastings, M.D., Medical Health Officer and Director of Social Service, City of Toronto.

"At this time . . . when it is being proven over and over again by enlightened municipalities that the public health can be conserved, morals improved and (Continued on Page 3.)

ARCHAEOLOGISTS MEET ON TUESDAY

Dr. MacLean Will Give Lecture on Pompeii.

Dr. R. A. MacLean of the Department of Classics will give an illustrated lecture on the subject: "Pompeii: Its ruins and its arts", under the auspices of the Archaeological Society of Montreal, next Tuesday evening, Dec. 20th at 8.30 p.m. in the lecture theatre of the Physics Building. Dr. MacLean has done considerable archaeological research in Pompeii and throughout the East, and is a recognized authority on his subject. The excavation of the ruins of Pompeii which stopped at the commencement of the war has been resumed with vigor by the Italian government.

The Honorary President of the Archaeological Society, Sir Arthur Currie, will preside, and following the lecture the annual meeting will be held. All interested are invited to be present.

FROSH USE NAME TAGS

So that its freshmen may quickly become acquainted with each other, Pennsylvania State College has its first year men and women wear name tags for the first week of school. The plan has made a hit, according to the Penn State Collegian, which says:

The custom started this fall and by the action of the student council this week becomes one of the regular college customs. The rules to be in force hereafter are practically the same as those that were in effect this fall.

The advantages of the custom were demonstrated this fall. The new men were aided in becoming acquainted with one another, the card in many cases serving as an introduction. It also helped the older men to become acquainted with the newcomers, and in every way served to familiarize the student body with one another.—The Argonaut.

MONTREAL, FRIDAY, DECEMBER 16, 1921.

A PRAISEWORTHY MOVE.

There has been a noticeable growth in the feeling of friendship between the colleges of the United States and Canada this year. This has been caused primarily by the numerous athletic meets that have been arranged between the universities of the two countries and in which McGill has played the major part as far as Canada is concerned.

While athletics have been the most noticeable factor to the eyes of the ordinary student, there are other mediums that have been as strong, if not more effective than them. The college newspapers in the country to the south have done everything in their power to create a feeling of good fellowship between their students and those of the universities of Canada, and their efforts certainly have not been in vain.

Every day there are well over a hundred copies of the publications of American colleges delivered to the McGill Union for the use of the staff of our own paper. Without exception, they have taken every chance possible to give news to the Canadian universities, and the references are always made in a complimentary vein.

As far as possible, we try to print items of interest concerning the activities of the students at American universities, but the large number of them makes it almost impossible to give them the prominence they deserve in the small space at our command. We feel, however, that the space devoted to McGill in the majority of papers is far out of proportion to our importance, when it is considered that there are a great many universities in their own country that are as large, if not larger than our own, and consequently have many more activities to be reported.

The work that is being done in bringing the students of the two countries closer together will have results many years from now. Friendships made while the young men are attending college may become a great factor in after life, and the better understanding of the aims of the people will serve to smooth over difficulties that may arise far in the future.

THE ARTS GRADUATE.

If a person asks a college man what he is studying, and he replies, "Oh, I'm in Medicine" or, "I intend to be a civil engineer," the reply is usually in the form of an enthusiastic commendation. "Why, that's fine, a splendid thing to be an engineer or a doctor, or a lawyer. But if, on the other hand, a man says, "Why, I'm taking an Arts course the reply is not likely to be so enthusiastic. And especially is this so if the questioner is a man of another faculty in the university.

It seems to be a prevalent idea that an Arts course is of little value unless one intends entering the ministry or the legal profession. The fact that few Arts students spend more than twenty hours a week at lectures is often considered sufficient ground for the statement that they have no work, and that the course has nothing to it. These impressions are abroad among the students, and need to be corrected from time to time.

The subjects studied in the Arts course are many and varied, some are cultural, some theoretical, and some quite practical. Enough subjects are always taken to give every student a grounding in several important branches. The main object of an Arts course is to stimulate real and unbiased thought on the problems of life. This is surely a commendable aim and one worth while if the subjects as taught help to develop leaders in thought and action. The subjects are not merely cultural, however.

Many great mathematicians and physicists have been Arts men, and not infrequently to-day the economist will give a truer estimate than the engineer in matters of big business. And what does an Arts man know when he graduates? He knows that he has a grounding in systematic thought which will enable him to explore the great things in life, he realises how little he knows, and how much there is to learn, but that, due to his study, he has the desire and the will to pursue a worthy objective, whether it be in the ministry, in law, the teaching profession, or in business.

HIGH PRESSURE.

It is a surprising fact that the man who is busiest seems to get his work done more efficiently than he who has lots of time to do it in. This is seemingly paradoxical, but is true nevertheless.

Look at the leaders in the business world—who are the Presidents of the great Corporations—those who have lots of time to spare, or those who are absolutely pressed for time. The most active and energetic men are those whose services are most sought after.

Take the medical and legal professions—the men who stand at the top notch are the keen thinkers who are able to work at top pressure for considerable periods. Again, those most sought after are ones who are the hardest to get.

The student may well look ahead and judge for himself if he will be in a like position in the world. Will he be one of the much sought after "high-pressure" men, or a man with plenty of leisure to do whatever comes along, waiting, like Micawber for "something to turn up?"

However, sometimes a student is under the impression that he is really working hard and has no time to spare when in reality his time is merely badly arranged. By condensing and rearrangement of his time, many a student has found that he could do more work, and at the same time have more leisure. That is real efficiency, and that man will be one of the high pressure men of the future.

Be busy, but be busy at something worth while, and you will find that when the time comes for quick efficient action you will be ready.

INFORMAL TO BE USUAL FAVORITE

Tickets Sold and Good Music and Floor Assured.

To night the dance enthusiasts will revel in the last informal before the holidays. The tickets have been limited as usual, and so no one need fear overcrowding.

The orchestra will be the McGill Dance Orchestra whose artistic ability is unquestioned. They have provided the music for all the informals this year, and are already in high favour with the dancers who attend these functions. They will be in holiday humour to-night and will exceed if possible their former reputation. The programme will be similar to previous informals and will have the same predominance of foxtrots. At foxtrots the McGill Dance Orchestra is romped without any question.

Those men who have not already signed their partners name on the book provided for that purpose are requested to do so before the dance. Coats and hats can be checked in the room usually used for that purpose and the list for taxis will be on the table as usual.

The floor will be specially finished for the occasion and will be slippery for the most fastidious.

The refreshments will be of the usual high order and the system found so good last time will be used again.

If the weather man does not see fit to favour the Informal with his usual snow storm the dance should be one of the most successful of the season.

ONE VIEW OF COLLEGE "DEMOCRACY."

From "Educational Unleveling" by Rollo Walter-Brown, in Harper's Magazine.

Closely akin to the evil of quantitative standards is another that the College that wishes to train leaders must successfully combat — namely, pseudo-democracy. In American College communities, being "democratic" too often means being like the majority, being "in the swim" being without unusual qualities or unusual tastes. It usually means, too, a spirit of intolerance for men or ideas that are at variance with the popular conception. This intolerance works to the advantage of the man who is below the average level, for he is forced to improve himself up to the general standard; but it works a great hardship to the man who is above the average. Any man who has superior mental ability is likely to have certain pronounced characteristics that do not contribute always to an easy life of good fellowship. He may not wish to spend all his spare time in the company of his nearest friends, yet if he isolate himself, or reveals an inclination to do so at times, he is called a snob or a highbrow. He may not be interested in College journalism, or College music, or College dances; yet if he possesses ability in any of these fields of activity and does not use it for the glory of his club or fraternity he is "yellow" and disloyal. If he enjoys conversation with his teachers or with intellectual women who are older than he is, his fellows "simply cannot understand it." Whatever may be the qualities which set him apart from the crowd, his friends persist in exerting influence, bringing pressure to bear, warning him that the highest duty of a student is to be a "good scout," until he yields up a large degree of his individuality, or is forced into the life of a social recluse. He must be like the rest or be no one; and when he yields to the pressure to be like the rest he surrenders the essence of his own soul, the receptive moments of his highest spiritual self, the prodigal flashes of divine enthusiasm — these do not spring from the miscellaneous chatter of his friends, or from the "jazz" music of the player-piano. The miscellaneous chatter and the "jazz" music should be tolerated, but so should the man whose tastes pull him at times toward something more significant.

A teacher was instructing a class in English and called on a small boy named Jimmy Brown. "James," she said, "write on the board, 'Richard can ride the mule if he wants to.'"

"Now," continued the teacher, when Jimmy had finished writing, "can you find a better form for that sentence?"

"Yes, ma'am, I think I can," was the prompt answer. "Richard can ride the mule if the mule wants him to."

EDITORIAL NOTES.

Last night the final contests in the B., W. and F. Club were run off, and the showing made by all those who took part is well worthy of commendation.

There was not a man who did not fight his very best, without wavering; if he was in a losing fight he was game to the last. It was a pleasure to see such spirit exhibited, and serves to show that not only on the playing field is the fighting McGill spirit paramount.

The B., W. and F. Club this year has exceeded all expectations, and, with a strong team to take part in the Intercollegiate assault-at-arms, McGill should make a good showing. The enthusiasm shown by all its members is due in large measure to the untiring efforts of the executive.

AT OTHER COLLEGES

The Harvard track team is planning a trip further South this Spring than the one which carried through Pennsylvania last season. With this in view correspondence is being carried on with the managements of the Naval Academy, University of Virginia and one or two other colleges, and the efforts of the Harvard folks seem likely to be crowned with success.

Harvard had meets practically arranged with the Navy and Virginia last season but made known the fact that there were colored athletes on their squad, allowing both managements a loop to withdraw before the final contracts were drawn up. Both did and the Crimson spent its Spring recess in Pennsylvania meeting first Penn State and the University of Pennsylvania.

Cornell's oarsmen turned to indoor practice last week for the first time since college opened. Outdoor rowing on the inlet was brought to a close last Saturday night, terminating the longest Fall practice in years. Not since 1909 have Cornell oarsmen been able to row on the inlet until the early part of December. Now that the football season is over and a number of big men who were on the varsity gridiron squad are free for other activities, Coach John Hoyle plans regular rowing practice for all varsity and freshmen candidates on the machines in the armory.

Forty-seven candidates reported for the Harvard varsity wrestling team in Hemenway Gymnasium. Frank J. Edlinski, the new coach, gave a talk on the rules, and then staged a ten-minute bout with Charley Eastman Harvard's light-heavyweight champion, to illustrate his remarks. Captain Fiske Brown, who has not yet recovered from injuries received in the football game with Yale, also spoke to the squad. Harvard expects to have a strong team. None of last year's veterans has been graduated.

Fordham will not be represented on the ice during the coming Winter months by a hockey team. This was definitely decided upon during the last week at a conference between the Faculty Director of Athletics and Gargan the newly appointed graduate manager. The extremely large financial losses that were attached to this sport during the 1920-21 season are the cause for this temporary dropping of hockey. The Maroon, therefore, will be forced to cancel about a dozen games, many of which had been tentatively arranged. Fordham had many attractive offers for games because of the fine record that the Bronx collegians made last season. It will be remembered that they went through the season undefeated against such strong opponents as Princeton, the University of Pennsylvania and Massachusetts Aggies.

Members of the Big Three are preparing for a great year in hockey and already the teams have gotten under way for the season's opening. The opening of the artificial arena at New Haven has been a great boon to hockey at Yale, which will be the first of the Big Three to swing into action, the Eli team being scheduled to open the season against Columbia on Dec. 14. Harvard is also on the ice, practicing at the Boston arena. Princeton, without an artificial rink, is handicapped but plans are now on foot for the building of a rink in the Tiger lair. It will not be available until the middle of January, however. In the meantime the Tigers are getting in their practice work at Philadelphia, where tryouts are being held for places on the team. During the Christmas holidays a squad of ten men will be taken to Lake Placid, N. Y., for a week. The first game of the Tigers will be against Dartmouth at Lake Placid on Dec. 31. The Harvard team will inaugurate the season in a game against St. Paul's school at Boston on Dec. 21.

More than 11 in every 100 Harvard men who served in the military or naval service during the war were the recipients of decorations and citations according to figures compiled in connection with the publication of "Harvard's Military Record in the War," and made public to-night by the Harvard War Records Office.

The war records show that 1,014 decorations were bestowed on Harvard men, in addition to 317 citations in the United States Army and 31 mentioned in dispatches of the British Army. The total number of Harvard men in the military and naval services, as far as

TICKETS FOR TEA SELLING RAPIDLY

R.V.C. The Dansant in Convocation Hall Saturday Afternoon.

Judging by the arrangements being made, the R. V. C. The Dansant on Saturday is going to be a great success. Although everyone at this time of the year is more or less "broke" it will be well worth their while to attend this function. Dancing will take place in the Convocation Hall and as usual, there will be excellent music provided for this.

Instead of tea being served in the Common Room, as at the last the dansant, small tables will be placed in the Hall and refreshments served there. Although the arrangements for serving have been changed, the refreshments themselves will be just as good as before, if not better. The Hall will be tastefully decorated to add a jolly Christmas feeling to the affair, so if you have not bought your ticket yet, be sure and do so at the next opportunity, otherwise you will have missed a most enjoyable time.

MANDOLIN CLUB PLANS PREPARED

To Leave Montreal on December 29th.

Plans for the Mandolin Club's tour are now practically complete. The intention is to leave Montreal on the morning of Thursday, December 29th, and proceed direct to Morrisburg, N. Y., where the first concert will be given that evening. On Friday they will leave for Cornwall, where the performance will be put on in the recently constructed movie palace. The party will be able to get back to Montreal by noon the next day.

Unfortunately, owing to an accident to his wrist, the club pianist Mr. Green, will be unable to accompany the party. However, the executive has had the good fortune to secure the services of Adney who is well known in college circles as a pianist. He will accompany the club at both concerts, and will no doubt prove an efficient substitute for Mr. Green. The executive also hopes to have Jimmie Rice who is well known to McGill as an entertainer, at one of the concerts at least.

An important practice of the club will be held next Tuesday at Peate's studio, at 7:15 sharp. This will be one of the last two or three practices, and so it is imperative that all the members are on hand. Also every man must bring his music, since at this practice the expression will be marked in red ink.

Records have been received at the university, was 11,398.

With the starting of the boxing classes at Dartmouth, word was received that a New England Boxing Tournament will probably be held after Christmas vacation in Boston, between Dartmouth, Harvard, Yale and M. I. T. If this tournament is held it will be the first one of its kind ever held in the East. In addition Dartmouth will hold a tournament to decide the championship of the college in both the novice and experienced classes.

Men and women must now sit apart at the Northwestern University football games. The coaches are disappointed with the brand of cheering turned out at the games, and they blame it on the fact that the men and girls sit together on the grandstand and forget to cheer.

Before one of the largest crowds that ever saw a football game in Seattle, Penn State, claimant to the Eastern gridiron title, defeated the University of Washington in their long-awaited intercollegiate battle. The score at the end of four periods of hard football was 21 to 7, or a margin of three touchdowns to one for Hugo Bodde's sturdy eleven.

Although willing to concede the superiority of the Easterners' this afternoon, Western enthusiasts were pointing tonight to the fact that the Penn State margin of victory was much smaller than that of California, which, earlier in the season, crushed the Sun Dodgers to the tune of 72 to 3. Arguing through this line the Coast devotees claim that the champions of the East are inferior to Coach Andy Smith's pupils, but few impartial observers expected Penn State to equal the California score, if for no other reason than the long train ride and the change of climatic conditions.

Frank "Dutch" Schwab, acting captain and star guard of this year's undefeated Lafayette College football team, entered a local hospital on Saturday to undergo an operation for appendicitis. Schwab was stricken with a minor attack of appendicitis three days before the game with the University of Pittsburgh, Oct. 1. He arose from bed a few hours before the game and played with a large pad of beefsteak over his appendix. Schwab played in all the remaining games thus protected. Despite this handicap, he played wonderful football and was selected on the All-American team by the New York Times. He is a member of the Junior class.

PEPYS AT MCGILL

Thursday, Dec. 15th. A cold tang in the air again this day that chilled the very marrow of my bones, but very cheery withal as the sun shone down most pleasantly upon the streets, and furthermore because I am no more troubled by the stealing of my bottled ale. The Juniors of our faculties were about between the discourses urging all true men of Arts to speed on the players at basketball in their contest with the scientists, and so I there much intrigued for never having seen the like before, and in truth I think it to be even more diverting than football by reason of the greater speed at which the players dart about the floor. Then to the Union to see those who fought with fisticuffs and rolled about in a phrenzy on the platform and then home and to bed somewhat sobered by the impending departure of my fellows when all will be loneliness for me about these colleges.

CHESS CLUB PASSED ENJOYABLE EVENING

Last night the McGill Chess Club engaged in a match with the Typo Chess club and emerged victorious by winning five games out of six. All the games were very interesting and well-contested. The McGill club were the guests of the Typo club and engaged the evening's play to the full.

The results of the matches were as follows:—

| McGill | Typo's |
|---------------------|------------------|
| G. Gaudet 0. | J. R. Kelly 1. |
| M. Ellison 1. | B. Nuteman 0. |
| R. J. Buggie 1. | A. McGown 0. |
| A. Malkevitch 1. | L. Desjarlais 0. |
| A. Ellison 1. | E. C. Mill 0. |
| G. H. Cartwright 1. | R. Bluteau 5. |

FACULTY OF ARTS TO MOVE THIS SPRING.

(Continued from Page 1.) Daily, it is probable that a charter will be secured for the R.V.C. in the near future; other constitutional matters are also reported. A committee has been appointed to revise the statutes of the whole University in order to bring these important documents up to date. It is anticipated that much revising will be necessary but when this is done and possibly the R.V.C. charter added, all the documents will be published for the first time.

After the constitution has been revised the next matter to receive the attention of this or a similar committee will be the revision of the documents of corporation. This latter, however, is not decided on and in all probability will not be done for some time.

A gorgeous girl is Helen Dunn. She never says "Ain'twegotfun!" —Pelican.

TY LEAGUE BALL TO COMMENCE SOON

Five Teams Entered in the City and District Baseball League.

At a meeting of the City and Indoor Baseball League held last night, five teams signified their intention of joining, and a schedule was drawn up. The five teams entered are the Macdonald Students and Staff, The R. C. R. and the Red and White teams from McGill. The schedule will commence on January 3rd and will run until April the 6th. It will be published at a later date.

Last year four teams entered the League and after a very close and exciting race the McGill Whites eventually captured the Championship. This year with five teams entered the race should be much closer and many interesting games are looked forward to.

The home games of the Macdonald Staff and the Students will be played at St. Anne's, the R. C. R. will use the Craig St. Drill Hall, while McGill will still have the Montreal High School.

However arrangements are being made to have the home games for the McGill teams played in the Craig St. Drill Hall and if successful, The City League will have the best playing space of any league in the city and should produce a Championship team that will be hard to beat.

The question of umpires was brought up in the meeting and it was decided to continue the same as last year and appoint umpires from players on the teams idle on the scheduled days. This system was very successful last year and should be again during this season.

As the schedule will start at the end of January, teams will have to be chosen in the near future. All men who have played for their class team in the class league should be out to try for a place and any others who have not yet turned out should do so at once, as those who made their appearance at every practice stand the best chance of being successful.

COMBINED MEETING SECTIONAL CLUBS

The Sectional Clubs will not hold a joint dance this year. This decision was arrived at last night when representatives of the various Sectional Clubs held a meeting in the Union. The matter was gone into very thoroughly and while it was felt desirable that some kind of a function should be held for the combined clubs the general opinion of the meeting was against holding a dance. The Union Ball Room can not accommodate more than one hundred and fifty while the membership of the Sectional Clubs must total well over six hundred. Thus only a small fraction of these members would be able to attend a dance. The idea of having a combined function has not been given up, however, and it was suggested that a Banquet be held sometime after Christmas. In the meantime the Sectional Clubs will go on with their plans for individual entertainments. The Western and Maritime Club are going ahead with plans for a combined dance soon after Christmas.

SECOND ROUND OF INTERCLASS BALL

Schedule to Commence on January Fifth.

Last evening the schedule for the second round of the class Indoor Baseball league was drawn up. Eleven teams were eligible thus allowing one team to draw a bye, which was Law '23 and as every team is very evenly matched, they will be the only ones to get into the third round in an easy fashion.

The schedule starts on January fifth, when Med. '26 and Dent '24 come together. This should be an exciting game to start the round with as both teams finished the first round with three wins to their credit and no losses.

The following is the schedule for the second round:
January 5th.—Med. '26 vs. Dent. '24.
January 6th.—Arts '22 vs. Sci. '23.
January 10th.—Med. '27 vs. Med. '24.
January 11th.—Comm. '22 vs. Arts '25.
January 12th.—Comm. '23 vs. Med. '25.
Law '23 drew a bye.

All representatives of the above teams interested in this schedule should take note of the date of their game, so that their team will be on hand without further notification. All games will be played at the High School at the usual hour and will be conducted under the elimination system.

Last evening there was a good turnout for the general practice for the City League teams. Attendance was taken for the first and second year men present and a snappy brand of ball was played. To-night there will be another general practice, for all first and second year men who intend trying for the teams, and those turning out regularly will stand the best chance.

In January all years will be represented at the practices and the two teams will be chosen then to represent McGill in the City and District Indoor Baseball League.

ARTS '23 ARE NOW CLASS CHAMPIONS

Defeat Science '23 in Final Basketball Game.

Arts '23, by defeating Science '23 last night by the score of 25 to 16, are now Champions of the Inter-Class Basketball league for the session 1921-22.

Arts won the game in the first half, when they piled up a total of sixteen points, while holding Science to two. Arts played all around the Science men in this half, they seemingly unable to get going, and losing frequent opportunities to score through poor passing and very wild shooting. Arts on the other hand, showed surprisingly good combination, and Van Vest scored three beautiful baskets on long shots from the centre of the floor. Craik and Whitmore, guards for Arts '23, were very effective and succeeded in breaking up dangerous looking rushes time and again, while the accurate shooting of their forwards seemed to disconcert the Science defence.

A large delegation of R.V.C. '23 girls, bearing their class emblem, arrived during half time, and proceeded to cheer on their team in a most enthusiastic manner. Perhaps the Arts students were a trifle nervous in the presence of their Co-Ed. class mates, at any rate the second half told a very different story to the first. Science succeeded in scoring fourteen points to their opponents nine, and after the first moments of the period the ball was in Arts end of the floor most of the time. Legg, Powell and Rourke at last got going, passed well and shot better, with the result that the final whistle found them pressing Arts hard, although the lead piled up against them in the first half was too great to overcome. Legg accounted for the majority of the Science team's points, netting five baskets in all, while Woodhouse and Graham scored for Arts.

The game was very clean throughout and was well handled by Timpell.

FRESHMAN COURTESY

There is a vast difference in the status of a preparatory school master and a university instructor or professor, in the eyes of the men he teaches. The former is a kind of God worshipped with all the reverence of short trousers; the latter a director of thought, something of a wise man, and often a strong personal friend. School masters always command without question the prefix of Doctor, Professor, or just plain Mister. Report comes that certain members of the Freshman class, profoundly impressed by their own advent, have seen fit to drop this prefix in favor of the more informal last name unadorned, when addressing faculty members. Bad manners are too often the result of exaggerated self-importance. Such exaggeration seems peculiarly out of place in a member of a month-old class.

This tendency is not alarming, owing to its restricted appearance among an insignificant minority of 1925. Yet it seems well to mention it for no other reason than to warn that small minority that they are, probably unconsciously, offending accepted standards of undergraduate courtesy.—Yale News.

NEW COURSE FOR SOCIAL SERVICE DEPT.

(Continued from Page 1.)
lives saved by a right knowledge of local conditions, it is opportune that the citizens of Montreal should for a time, cease discussing the slums of London and the tenement house evils of New York, and endeavour to learn something about themselves and to understand more perfectly the conditions present in their very midst.—Sir Herbert Ames, 1897, in "The City Below the Hill."

JAN. 30th. "THE WHITE PLAGUE."
J. RODDICK-BYERS, M.D.
Superintendent Laurentian Sanitarium, Ste. Agathe des Monts, P. Q.
"Tuberculosis attacks people between the ages of twenty and forty, when they are at their highest economic value. We cry aloud that Canada needs immigrants. Over one thousand people die every year in the City of Montreal from tuberculosis. The economic value of a human being is estimated at \$3,000, so that we lose, in this city alone not less than THREE MILLION DOLLARS per year!"

Tuberculosis is a preventable disease. Why not prevent it?

FEBRUARY 6th. "PLAY IN EDUCATION. BY MISS ETHEL DOODS
Head resident, St. Christopher House, Toronto.

"The boy without a playground is father to the man without a job. Play is the most serious thing in a child's life: play is an essential part of education. School forms the child to meet actual social opportunities: without school he will not fit our institutions: without play he will not grow up at all."

"Don't lose your head," said the courtier as Anne Boleyn went to meet the king.
—ERM.

PRINCETONIAN SPEAKS OF MEDICAL SCHOOLS

This article is the result of an interview in the Daily Princetonian with Professor Edwin Grant Corklin one of the foremost biologists of the United States and head of the department of Biology at Princeton.

To begin with, in the choice of a profession in general, there are three phases of the question which must be considered as of the utmost importance. I think, first of all, the student ought to know something about the various fields the courses and the nature of the work in the professional schools. Then he ought to know about the first few years that follow the receiving of the degree. Thirdly, he must know about the character of the work involved in the pursuit of the profession.

If any student who has looked into these three phases of the professions feels attracted toward any one of them, he will succeed better where his interest lies. A man should, above all, choose for himself and should not ever be influenced by his parents or an outsider.

Having decided on his profession, the next thing is to choose the professional school to which he wishes to go. In doing this he should be guided by the following four principles: first, and most important—the quality of instruction offered, and the standing of the school among professional men. Second—the desire to study with particular specialists, especially if he thinks of making a specialty of any one of these lines.

Third—what may be called 'local advantages,' such as the benefit coming from the ability to take one's degree and doing one's apprenticeship in the same place, or the opportunity to work in hospitals, law offices, or other situations in the place where one expects to begin his active career. Fourth—inducements in the way of scholarships, fellowships, or other means of meeting financial obligations.

Next comes the sifting up of the various medical institutions. For the best information relative to this phase I advise the student to refer to the compilation of the Carnegie Foundation for Advancement of Teaching, "Medical Education in the United States and Canada." This publication gives a very complete description of all the schools in the country, classified according to states.

Among the valuable matter it contains, which every prospective physician should read carefully are these most important considerations of entrance requirements, attendance, teaching staff, laboratory, and clinical facilities of the individual schools. Any man going into medicine should choose wisely, giving attention to all of these details.

If I were deciding for myself which University I should apply the principles outlined above. For example, if one is looking forward to the general practice of medicine, it would be advisable to consider the members of schools' faculties and the courses given by them on the subject of the practice of medicine. That school should then be chosen in which the best men are found in that chair.

In short, one school will be stronger than another in some particular branch. If one wishes to specialize in any one subject, he should choose the school in which that subject is best represented. The necessary information will be available from the school's catalogues.

Furthermore, in choosing his school, he should be influenced by the consideration of where he will get the most help from men already established in that profession. The help thus derived is exceedingly valuable at a time when he is just starting upon his medical career. It is natural that professors in professional schools will take a larger interest in helping their men to get started in practice than will persons who are comparative strangers.

And both for this reason, and for the additional advantage which comes in instruction in small classes, one should choose a school in which, other things being equal, the number of students is limited—or at least small enough so that individual attention can be given to each man.

LAUGH FOR YOUR BRAIN'S SAKE

Perhaps not many people saw the little item in the paper recently about how General Pershing went to a fancy-dress ball disguised as a Turkish sultan, in red dressing gown and curly-toed slippers. It deserves repetition, because it showed that a man can have done a tremendous lot of work and carried a great load of responsibility and yet not have forgotten how to play. Play isn't something you do to kill time. Play is exactly as essential for a complete life as work.

If we would get the best service out of our minds, says Dr. Woods Hutchinson, we must give them a healthy amount of amusement. "Nothing takes the kinks out of our mental muscles," he writes, "and flushes out the fatigue poisons from our brains so quickly as a hearty laugh."

Madison, Wis.—The green Freshman cap and the Freshman-Sophomore rush have been reinstated at the University of Wisconsin as a result of a referendum vote taken by the men students. This action followed the decision made last semester by the Student Senate to abolish these traditions. The vote stood 1421 for, and 248 against.

FINE BOXING PRODUCED AT UNION SMOKER

(Continued from Page 1.)
the two contenders, and proved worthy. Both men showed a good deal of science, but Graham had a longer reach, and managed to land more blows than his opponent which proved the undoing of the Med. Graham won.

Charles of Medicine and Champion of Science then battled it out for the welterweight boxing title. Charles deserves a great deal of credit for boxing as he entered the ring with a sprained right hand. This did not deter him from putting up a fine fight. The match was fairly even at the first but in the last one Champion had the margin over his opponent, and was given the decision.

Geo. Smith, the wrestling coach, and Dave McKee, the heavyweight wrestling champion, gave a demonstration of many of the different holds in the game. They showed first a series of standing holds and then went on to the chanceries and crotch holds; they also demonstrated a variety of nelson and counters for the different grips. This innovation was very successful, and was much appreciated by all.

Armstrong and Bain put up a fine battle in the 158 lb. wrestling. They went at it hard, but Bain managed to keep the top position for the greater part of the time, and also got a fall from Armstrong, winning the bout.

Freedman and Rumble, two lightweight wrestlers provided a good deal of excitement. Freedman won the first fall with a headlock, but Rumble evened up the matters in a couple of minutes by taking a fall out of Freedman. Freedman had the better of the match on the whole, although by a very close margin, and was given the decision.

Smith, a Macdonald College man, and the first one to fight in the interfaculty tournament here, went into the ring with Martineau of Arts. The bout on the whole was rather slow, although productive of a little hard hitting. Smith won.

Cope of Arts and Sullivan of Medicine in the 135 lb. boxing provided the most exciting bout of the evening. Everyone in the audience kept their eyes glued on these boxers every moment that they were in the ring. In the first round Cope had the edge. They went at it hammer and tongs, each landing some fine wallop. For about half a minute it looked as if Sullivan was going to be knocked out, but in the second round he came back strong and reversed the position. In the third round Cope took tremendous amount of punishment from the Med. Sullivan had a husky wallop in his right which he used to a great advantage. Cope was floored twice during the last three minutes, but stuck out until the end of the time.

In the middleweight boxing, Abinovitch of Arts and Boucher of Medicine fought three fine rounds. These two both mixed it up in fine style, and hit each other hard. They were very even in the first three rounds and an extra one had to be called for in order to decide the winner. In the last three minutes Boucher landed on Abinovitch oftener and was declared the winner.

Coach Ernie Robinson refereed the boxing bouts, and Jack McBrierty and Sgt. Major Sharpe were the judges. In the wrestling Coach Geo. Smith refereed while Dave McKee and Mr. Egan of the M.A.A.A. were the judges. In the fencing Prof. Williams was the referee, and Mr. Raomondi the umpire. A great deal of credit is due to these men for coming out and helping the club to make the smoker a success.

Coach Ernie Robinson has certainly trained a fine bunch of men, and they showed it last night. Credit must also be given to the faculty representatives, especially Shorty Morris of Medicine who worked very hard to get the men out. Bill Brewer must not be forgotten for by his hard work he made the success of the smoker possible.

There was a larger turnout of students. Several members of the faculty, including Sir Arthur Currie attended the affair. Sir Arthur presented the medals to the winners of the faculty at the end of the evening's performance. Dave McKee also made a short speech thanking the students for turning out in such large numbers.

The following is a list of the bouts and the winners:—

| | |
|---------------|---|
| Boxing: | |
| 110 lb. class | Mirsky, Med. beat Schleifer, Arts. |
| 118 lb. class | Wilson Science, beat Goldapple, Commerce. |
| 125 lb. class | Graham, Science beat Snow, Med. |
| 135 lb. class | Sullivan, Med. beat Cope, Arts. |
| 145 lb. class | Champion, Science beat Charles, Med. |
| 158 lb. class | Boucher, Med. beat Abinovitch, Arts. |

ONTARIO SMOKER ON MONDAY NIGHT

A Good Programme of Entertainment is Planned

On Monday night the Ontario Club will hold their second smoker of the year in the Union cafeteria when a special programme of entertainment will be presented; cigarettes, tobacco, refreshments, and songs will do their share in making the evening a success.

The music is to be supplied by the Ontario Club Orchestra assisted by a double quartette from the Glee club and a violin solo. Mr. Ware of Westmount said that he would try to come, and amuse the gathering with his adroit card tricks. Professor Tate of the Faculty of Arts is giving a short talk on conditions in Ireland and another speaker is promised. The boxing will be of a good order; Simpson and Gow of Commerce will again meet and can be relied upon to give an excellent exhibition. Several other bouts will be fought probably including one of blindfold boxing.

As a certain amount of expense is involved in a smoker such as this, only those men who have paid their subscription fee of two dollars or those who intend to join the organization at the smoker are expected to attend. These are being received by all faculty representatives or members of the executive. As this is the last chance for Ontario men to join this organization before they go home for Christmas an extra large crowd is expected.

UNUSUAL INTEREST IN FOREIGN TRADE.

Recent statistics report a remarkable growth in the higher institutions of learning since 1916 in respect to educational preparation for foreign service, for commerce in particular. The United States Commissioner of Education has appointed a committee of 15 on educational preparation for foreign service to investigate and report from time to time on this important type of training.

Dr. Gwenn Levin Swiggett, the chairman, reports that nearly 12 per cent of the colleges report courses in foreign service, special emphasis being laid on foreign trade. Of the 71 higher institutions in which this special training is now offered, the ten highest each report more than 100 students enrolled in foreign trade courses. The total enrollment for these ten institutions in such courses is 2,225, about one-fifth the total enrollment for all courses in collegiate schools of business. The University of Washington, Seattle, heads the list with 407 students taking foreign service studies. New York University is second with an enrollment of 401.

175 lb. class Smith, Macdonald College beat Martineau, Arts.

Wrestling:
118 lb. class Macdonald beat Pfeiffer.
125 lb. class Matthews beat Reid.
135 lb. class Irvine beat Howes.
145 lb. class Cohen beat Brisbane.
158 lb. class Bain beat Armstrong.
175 lb. class Freedman beat Rumble.
Fencing:
Fielding beat Smith.

McGill Men!

In telling the merchants of the city when you make purchases from them, that you are from McGill, and that you are out to give "McGill Daily" advertisers first chance, you are doing nothing more than giving a square deal to two people---the Daily and the Advertiser.

And you owe it to them!!!

NOTICES

This evening, at 8.15, in the Physics Building, the Montreal Section of the Society of Chemical Industry will hold its regular monthly meeting, at which Prof. A. S. Eve, of the Department of Physics will lecture on the subject of "Wireless Telephony," with the assistance of Mr. D. R. P. Coates and the Marconi Company. The lecture will be accompanied by a practical demonstration, which should be of interest to all students of science.

A cordial invitation is extended to all the students of the University, and ladies are especially invited to attend.

LECTURE ON POMPEII.

An illustrated lecture entitled—"Pompeii: Its ruins and its art," will be given by Dr. R. A. MacLean, of the Department of Classics, under the auspices of the Archaeological Society of Montreal, in the lecture theatre of the Physics Building, Tuesday, Dec. 20th, at 8.30 p.m. Students are cordially invited to attend.

ANNUAL PHOTOGRAPHS — CHEMICAL ENGINEERING STUDENTS.

As notified to-day, out-of-town Chemical Engineering Juniors will kindly arrange to have their photographs taken between the hours of 12 noon and 1.30 p.m. on Friday, 16th December.

The place is the Photo Kraft Studio, 60 St. Matthew Street, corner St. Matthew and St. Catherine.

Out of town addresses should be given to the photographer, so that proofs can be sent for selection during the vacation.

SUNDAY MUSICALES.

Owing to the Christmas vacation commencing next week, there will be no Musicales on Sunday next, 18th December.

These concerts will recommence on Sunday, January 22nd, and will continue throughout the season.

F. J. TOOLE,

Mgr. Students' Orchestra.

Intermediate "A" basketballers are requested to be on hand at 7 o'clock Saturday night in Molson's Hall, to play against M.A.A.A.

Intermediate "B" basketball team is to play the "Alerts" at the Railroad Y.M.C.A., Point St. Charles, at eight o'clock Saturday evening. Those wishing to accompany the team will meet at the Union at 7.15 p.m.

SNOWSHOE CLUB.

Members are particularly requested to remember to bring back their snow shoes with them after the Christmas holidays.

ATHLETIC ASSOCIATION.

There will be a meeting of the executive of the Athletic Association in the Union this afternoon at five o'clock.

CHEMICAL SOCIETY.

The next meeting of the Chemical Society will be held in the Chemistry Building, at 5 o'clock to-day. "Water for Industrial Purposes" will be the subject, which will be introduced by C. Hazen.

All students interested are invited to attend.

S. C. A.

There will be a membership meeting of the S. C. A. of McGill at Strathcona Hall at 11 a.m. on Sunday, Dec. 18. The purpose of the meeting is to bring together the members for a consideration of some of the primary responsibilities of these Associations. Persons actively interested in either Associations, although not members, will not be excluded.

DENT. '25.

There will be a hockey practice to-day from 2 to 3 on the Campus Rink. All men interested are requested to bring skates and sticks and be on hand promptly at the hour.

There will be a general practice for all first and second year men who intend to try for a place on one of the two teams entered in the City and District Indoor Baseball League at the High School at 6 p.m. Attendance will be taken and a large number of men are expected to turn out.

R.V.C. THE DANSANT.

Plans are practically completed now for the Thè Dansant, to be given at the R.V.C. on Saturday, Dec. 17, and tickets have been selling rapidly all week. There are still some tickets on sale (at 75 cents each), which may be obtained from R.V.C. students, or at the Union, or at Strathcona Hall. Everything promises to make the function most enjoyable, and the arrangements will be even better than last time, so that it is certain to be a great success in every way. Will all those who wish to obtain tickets please secure them as soon as possible, as the number is limited.

R.V.C. OUT-OF-TOWN JUNIORS. Please read the list on the R.V.C. Notice Board, and have your photographs taken at the time indicated. The photographer is at the corner of St. Matthew and St. Catherine Sts., upstairs. The place is called "Photokraft."

LOWER CANADA COLLEGE OLD BOYS' DANCE.

Lower Canada College Old Boys will please note that the date of their dance will be the 22nd, and not the 23rd, as was previously announced in these columns. Prices of tickets to this function will be five dollars a couple for Old Boys, and ten dollars a couple for all not past students. Tickets may be secured from the Hall Porter of the Union.

PRACTICE SCHEDULE.

LOST.

Dissecting Set.—In the Union or in the Zoology Laboratory. Will finder please return to Wener of Med. '27.

PROFESSOR EVE SPEAKS TONIGHT

Assisted by Marconi Wireless Demonstration.

A very interesting lecture on "Wireless Telegraphy" will be delivered tonight by Prof. A. S. Eve, of the Physics Department, at eight-fifteen in the Physics building. Prof. Eve is well known both in University and outside scientific circles, and his lecture should be of great interest. Assisted as he is by Mr. D. R. P. Coates, the wireless expert and of the Marconi Company, the lecture will be of a very practical type and yet not too technical for the understanding of the average person.

The discussion is to be delivered under the auspices of the Montreal Section of the Society of Chemical Industry, which holds its regular monthly meeting tonight.

The topic is of such popular interest, and treated by such eminent authorities tonight, that every student should make it his or her business to attend.

HEALTH IS BASIS FOR ALL FEMININE BEAUTY.

"Health is the basis for all true beauty," says Dr. Martha Bacon of the women's physical education department at the University of Kansas. "Checks that glow with the red corpuscles of the blood within, and eyes that shine from a depth of soul and beauty of disposition behind them cause anyone to appear beautiful regardless of irregular features."

The physical education department is striving to make the gymnasium work a play hour for students in which they can find relief from strenuous hill activities in wholesome, health-building play according to Dr. Bacon. She highly approves of swimming, dancing, hockey and similar activities as healthful forms of exercise.

Self-distrust is the cause of most of our failures. In the assurance of strength they are the weakest, however strong, who have no faith in themselves and their powers.

LOST.

Between R.V.C., Arts Building, via the "ink" in the hollow, a small gold badge, name of I. Klachu engraved on the back. Finder please leave with R.V.C. Porter.

JUNIOR YEAR BOOK.

5.00 p.m.—Juniors, except men who are laying with Junior C.
6.00 p.m.—Intermediates, shooting practice only for any men who can turn out.

GENERAL MEETING OF S.C.A. SUNDAY

To be Held at 11 A.M. in Strathcona Hall.

The executive of the two Student Christian Associations at McGill have decided upon a general membership meeting to be held in Strathcona Hall, Sunday Dec. 18th, at 11.00 a.m. The meeting will afford an opportunity for the members as a whole to review past work and discuss future policies of the Movement, also for new members to gain a more intimate knowledge of what the S.C.A. stands for, to what it aspires, by what method it works. A meeting of this character will in future take place on Sunday morning once a month rather than in the evening as formerly, when it displaced the "Sing."

On Sunday morning next Miss Mary Fry will speak on "The Outlook at McGill this Year." The addresses will be short in order that discussion on these important subjects may not be restricted. There is no desire that the meeting be large merely for the sake of bigness, but rather that those who believe in the S. C. A. or are interested in it, should be there. While the meeting is primarily for members of the Associations at McGill, others who desire to identify themselves in some measure with their work will be most welcome.

MCGILL STUDENTS

All well dressed students go to Goodman's to hire their dress suit or tuxedo. 669 St. Lawrence St. Phone E. 6624.

Dress Suits to Rent

FOR THE OCCASION
Also Dress Shirts, Bows, Collars to go with our Dress Suits. Special price for suits to order.

TAKE HEART, SISTERS.

You've all heard the tale of the college vamp.
The cute little thing at a ball;
You've heard of the way she ropes in the men
And the way those poor mortals fall.

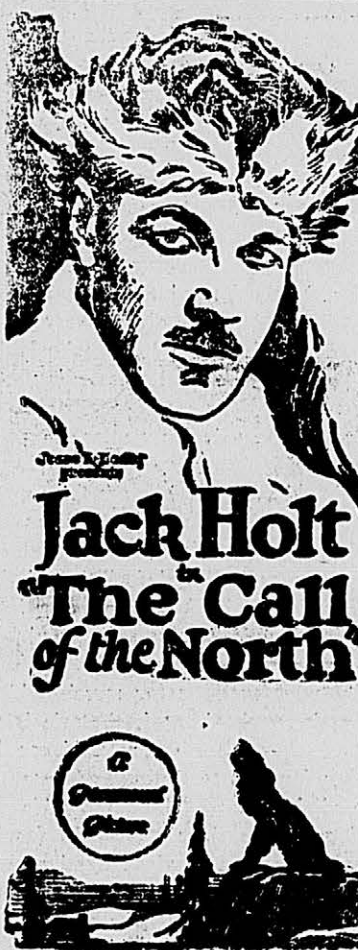

You've heard of the college widow, no doubt,
And the staggering line that she has;
And you've seen all the men chase after her, when
They tire of the queen of the jazz.

But somehow it seems that among all the queens,
The sweet little thing that we wed
Is neither the vamp nor the widow you lamp.
But our old-fashioned sweetheart instead.

—Virginia Reel.
